Bhanuka Gihan

Software Engineer - Full Stack

Kegalle, Sri Lanka | +94 752960845 (WhatsApp)

Linkedin | Github | www.bhanuka99x.me | bhanuka99xdev@gmail.com

PROFESSIONAL SUMMARY

Results-driven Full-Stack Software Engineer with hands-on experience building production-ready web applications, browser extensions, and SaaS platforms. Proficient in modern JavaScript ecosystems (React.js, Node.js) and specialized in seamlessly integrating AI solutions and real-time features. Adept at managing end-to-end development lifecycles to deliver high-performance, user-centric digital products.

CORE SKILLS

- **Frontend Development :** React.js, Next.js, TypeScript, JavaScript, Tailwind CSS, CSS3, State Management, UI/UX, Framer Motion, Recharts.js, EmailJS, Context API
- **Backend & APIs :** node.js, Express.js, System Design, REST APIs, WebSocket, Authentication, JWT, Web Security, RBAC, Encryption, API Hardening
- **Database Management :** PostgreSQL, MySQL, Redis, Database Design, ORMs, Sequelize, Data Caching, Firebase, supabase Auth, AWS S3, Firebase Auth
- **Cloud & Infrastructure :** VPS, Web Hosting, CI/CD, Microsoft Azure , Github
- **Quality & Tools :** Playwright, Jest, Postman API, Performance Optimizations(Redis Caching), Atomic Transactions
- **AI & Automation :** AI Agents, Copilot, Claude Code, Replicate AI API Service

WORK EXPERIENCE

Software Engineer Intern (Click to view more details)

Oxymai (PVT) LTD | Sri Lanka (Remote) — Sep 2025 - Mar 2026

- Delivered 12+ robust, high-performance web applications utilizing React.js and Node.js.
- Built scalable task management platforms featuring complex Role-Based Access Control (RBAC) and real-time collaboration.
- Integrated AI models via Replicate API to automate advanced media processing, including image and video manipulation.
- Enhanced system responsiveness and minimized database latency by implementing Redis caching strategies.
- Secured RESTful APIs and implemented enterprise-level user authentication flows using Firebase and Supabase

Freelance Software Developer (Click to view more details)

Self - Employed | (Remote) — Jan 2024 - Sep 2025

- Completed 10+ web projects for local and international clients with 100% satisfaction.
- Built responsive websites and portfolio platforms using JavaScript, PHP, and modern CSS.
- Managed end-to-end project lifecycles, from requirement gathering to deployment and SEO.

FEATURE PROJECTS

TabTask - Team Task Management Platform (View Full Details)

Tech Stack : React, Node.js, Express, PostgreSQL, Redis, Supabase, AWS S3, Socket.IO

A collaborative platform for teams to manage tasks in real-time. It helps organizations organize work with Kanban boards, track progress with analytics, and control access with a detailed permission system

- Team members see changes and updates instantly without refreshing the page.
- Detailed role-based control to manage what each team member can see and do.
- Easy-to-use boards with drag-and-drop, subtasks, and built-in timers.
- Visual dashboards and charts to track team productivity and task completion.

AI Background Remover (View Full Details)

Tech Stack : React 19, Node.js, Firebase, Socket.io, Replicate AI, Tailwind CSS

A professional SaaS tool that uses AI to automatically remove backgrounds from images. It supports both single image processing and bulk uploads for high-volume work.

- Automatically detects and removes backgrounds with professional quality.
- Upload and clean many images at once using a smart folder management system.
- Users see the AI working in real-time through WebSocket technology.
- A reliable system to manage user credits and processing limits.

Reframer - AI Video Resizer (View Full Details)

Tech Stack : React 19, Node.js, Firebase, Replicate AI (Luma AI), Tailwind CSS.

An AI-powered tool that automatically resizes videos for social media (TikTok, Instagram, YouTube). It uses AI to keep the most important parts of the video in focus without manual cropping.

- AI automatically keeps the person or object in the center when resizing.
- Quickly converts videos into 7 different aspect ratios for various social apps.
- Users can reframe videos directly from their browser while surfing.
- Handles everything from upload to conversion and secure storage automatically.

TabTask V2 - Personal Productivity Extension (View Full Details)

Tech Stack : React 19, Node.js, PostgreSQL, Socket.io, Supabase Auth, Tailwind CSS 4.

A powerful browser extension that combines tasks, a focus timer, notes, and bookmarks into one place. It creates a personalized "new tab" experience to keep users organized.

- Combines task management, rich notes, and bookmarks in a single interface.
- Helps users stay productive with timed work sessions and break reminders.
- All data stays updated across different devices and browser tabs instantly.
- Desktop notifications that work even when you're not actively using the app.

EDUCATION

Higher National Diploma in Information Technology (HNDIT)

SLIATE - Kegalle, Sri Lanka — Sep 2023 - Mar 2026

- Specialized in Software Engineering.
- Focused on advanced data structures, algorithms, and modern full-stack development technologies.

GCE Advanced Level (A/L)

KG/Bandaranayake M.V - Kegalle, Sri Lanka — Aug 2018 - Nov 2020

- Focused on Mathematics, Physics and Chemistry fundamentals.
